MONTHLY WEATHER MAP

METEOROLOGICAL SERVICE, DOMINION OF CANADA

SEPTEMBER 1935

TEMPERATURE

The mean temperature for September was generally below normal from Newfoundland and the Atlantic Provinces westward to the western Manitoba boundary as well as in the lower Mackenzie River valley and along a narrow strip of the British Columbian coast. In the remainder of British Columbia, in Alberta, and Saskatchewan, in the Yukon and the greater part of the Northwest Territories the mean temperatures were above the normal September temperatures.

Along the coast in British Columbia and on the western part of Vancouver Island temperatures were normal or very slightly below. On the eastern part of Vancouver Island and in central and northern British Columbia the mean temperatures were normal to two degrees above. In the southern interior valleys there were excesses of three to five degrees.

Mean temperatures in Alberta were four to six degrees above normal along the international border and in the eastern section of the province between the North and South Saskatchewan Rivers. In the Bow River valley there were excesses of one to three degrees. In the Calgary and Edmonton districts as well as in the Peace and Athabaska River valleys mean temperatures were normal to three degrees above.

In southern Saskatchewan south of the main line of the C.P.R. there were local excesses of four to six degrees. Southeast of Saskatoon and in the Kindersley-Empress district the mean temperatures were four to five degrees above normal. The remainder of the province was normal to three degrees above.

In the grain-growing sections of Manitoba the mean temperatures ranged from two degrees below to one degree above normal. In the lake region and northern Manitoba the temperature was normal to five degrees below.

In the Kenora, Rainy River, and Thunder Bay districts there were deficiencies of one to five degrees. In the Algoma, Sudbury and Timiskaming districts and on Manitoulin Island the temperatures were three to four degrees below normal while there were deficiencies of one to two degrees in the Cochrane district. In southern Ontario the temperatures were normal to three degrees below except on the ridge between the Ottawa River and Lake Ontario and in the Georgian Bay district where there were deficiencies of three to five degrees.

In Quebec the mean temperature was generally one to three degrees below normal except in the Laurentian Hills where there were deficiencies of three to six degrees.

The mean temperatures were generally below normal in the Atlantic Provinces. In New Brunswick and Prince Edward Island the temperature ranged from normal to three degrees below normal while in Nova Scotia there were deficiencies of one to four degrees. Along the southeastern coast of Newfoundland mean temperatures were about one degree below normal, while on the southwest coast and in the interior there were deficiencies of three to four degrees or more.

Along Hudson Strait there were excesses of one to three degrees while along the west side of Hudson Bay the temperatures were normal to two degrees above normal.

PRECIPITATION

The precipitation was generally below normal in British Columbia except locally on the southeastern part of Vancouver Island and in the lower Fraser River valley. In the Thompson and Okanagan valleys there were large deficiencies of 75 to 90% while the month was one of the sunniest Septembers on record in the southern interior valleys as well as on southern Vancouver Island.

Over the prairies the month was generally quite dry to very dry. In Alberta there were deficiencies of 15 to 45% in the Peace River district, 30 to 75% in the North Saskatchewan and Red Deer River valleys while in southern Alberta the precipitation was 75 to 90% below normal except in the extreme southwestern corner of the province where the deficiency was 50%.

In Saskatchewan south of Kindersley, Outlook and Qu'Appelle the total precipitation was 75 to 95% below normal with local exceptions. Northward towards Prince Albert and Battleford the deficiencies ranged from 20 to 65%.

In the Manitoba grain belt the precipitation was generally about 35% below normal but in the extreme southwest deficiencies ranged from 50 to 70%.

In Kenora and Rainy River districts in Ontario there were deficiencies of 20 to 50% and 30% generally. The remainder of Northern Ontario had above normal precipitation except the east shore of Lake Superior where the precipitation was normal to 10% below. In southern Ontario the precipitation was 10 to 50% below normal in the counties bordering Lakes Huron, St. Clair and Erie. In the Georgian Bay district and in the Lake Ontario counties there were excesses of 5 to 20%. In the upper Ottawa River valley and southward towards Lake Ontario there were deficiencies of 10 to 60% and 30% generally. Along the lower Ottawa and upper St. Lawrence in Ontario there were excesses of 5 to 60% and 30% generally.

In Quebec along the upper and middle St. Lawrence and lower Ottawa Rivers there were excesses of 10 to 60%. Along the upper Ottawa River and northward to the Height of Land the precipitation was 10 to 50% below normal. In the Lake St. John region the precipitation ranged from 10% below to 10% above normal while the excess in the upper St. Maurice valley was 50% or more. Along the lower St. Lawrence, in Gaspé Peninsula and along the north shore of the Gulf there were deficiencies of 10 to 50%.

In New Brunswick there were excesses of 10 to 65% generally except in the southern part of the province where there were local deficiencies. On the southeast coast of Nova Scotia from Cape Sable to Canso the rainfall was double the usual amount. Along the south shore of the Bay of Fundy the excess was 40% or more, around the Basin of Minas 50 to 75%, on Cape Breton Island 50% or more, but on Prince Edward Island about 25%.

The precipitation in Newfoundland was reported to be two to three times the normal amount in the southern part and practically normal in the north.

A. J. CONNOR

SPECIAL REPORTS

NOTE—Column H is Highest Temperature; Column L is Lowest Temperature; Column P is Precipitation in inches; Column I denotes total of bright sunshine in hours during the month; Column Tm is the mean temperature of the current month.
